

FET Colleges

With our extensive experience in supporting educational institutions in the UK, we are able to deliver the complete end-to-end disability support solution for FET Colleges and Universities in South Africa, in supporting their learners to achieve their true potential.

This service supports learners with a wide spectrum of disabilities and/or difficulties including ones such as:

- Cognitive
 - Dyslexia
 - Dyspraxia

- Hearing
 - Hard of hearing
 - Deaf

- Visual
 - Visual impairment
 - Blind

- Physical
 - Wheelchair users
 - Amputees

Our Service

Our service comprises of individual modules that can work independently or together as a complete solution.

Assessments

Our assessments are conducted by highly experienced and certified assessors. Our assessors accurately identify the needs of a learner, recommending the most effective and appropriate solution. This can come in the form of both the provision of equipment and coping strategies.

Assessments can be conducted face-to-face or remotely.

Equipment supply

With our extensive work in the Assistive Technology industry, we have built strong relationships which give us access to a vast spectrum of the most innovative products in the world.

Our equipment supply can come in the form of hardware, software and ergonomics.

Installation & Training

Our trained installers will set up your equipment ready for learners to utilise.

Our expert trainers hold certifications from a range of manufacturers and many also have teaching qualifications. They will show the learner how best to utilise the recommended solution to achieve the maximum benefits.

Support

With over 20 years of experience and the largest technical support team in Europe, our technicians are highly experienced, providing the most effective support for

hardware and software issues.

We have certified Microsoft and Apple technicians along with many who are certified in delivering support for specific hardware and software products.
